DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28, 29, 59-60, drawn to estimating a communication path quality by switching between a downlink common pilot channel transmitted with a first directivity and a downlink dedicated control channel transmitted with second directivity, classified in class 455, subclass 67.11.
 - II. Claims 29-38 and 40-58, drawn to measuring a first communication path quality in a data receiving state and a second communication path quality in a data waiting state, classified in class 455, subclass 67.11.
2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Group I has separate utility such as measuring the communication path quality between an adaptive array base station and changing the direction

of the adaptive array based on the estimation of the communication quality. See MPEP § 806.05(d).

3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
